## Statement of Achievement

Presented to:

Iury Coelho

Name

During the Cisco Networking Academy® self-paced course, the student has studied the following skills:

- the universal concepts of computer programming (i.e., variables, flow control, data structures, algorithms, conditional execution, loops, functions, etc.)

- developer tools and the runtime environment;

- the syntax and semantics of the Python language;

- the fundamentals of object-oriented programming and the way they are adopted in Python;

- the means by which to resolve typical implementation problems;

- the writing of Python programs using standard language infrastructure;

- fundamental programming techniques, best practices, customs and vocabulary, including the most common library functions in Python 3.
